Claire – The attached WORD document should replace the text found here:
<http://www.epa.gov/pesticides/regulating/rozol.html>

Thanks and let me know if you have any questions.

John,

Send me what you have; we should be able to get this done quickly. If there are documents that should be added to ChemSearch or PPLS, the Web team can do that, too.

Thanks for the quick replies!

Chris Gillis is gone on detail to OCSPP. I believe Claire Gesalman is now OPP's web content coordinator, so my first guess would be to send it to her and CC the ITRMD web team. Between the two, they should be able to update the content. It's my understanding that FEAD/CSB has a reduced

role in basic web content maintenance and upkeep now.

In the meantime, I'll respond to the webmail writer and let her know the status of Rozol in NM. That should go over like a lead balloon...

Thanks again for the quick follow-up.

Subject: RE: Rozol Q re: use in NM- from webmail

Melissa Grable in EFED has fielded several calls about this. The information on our website has not been updated to reflect that Rozol and Kaput are currently approved for use in NM. We have revised text for the website that OGC put together for us. The NM prohibition was tied to ESA litigation. Upon completion of the FWS consultation we accepted new labeling allowing use in NM. I should have the revised language ready to be posted to the web by today/tomorrow. Who in FEAD can I send that too? Chris Gillis?

Fyi – March 15 is the last day of the prairie dog baiting use season (Oct 1 – March 15).

Thanks,
john

Yvette,

Someone in RD should weigh in on this. I've copied John Hebert.

Laura,

Are you the person who might be able to address this issue? If not, who might you suggest?

Subject: Webmail for Enforcement staff?

A webmail writer alleges that Clovis, NM plans to use Rozol on the Black Tailed Prairie dogs, but it appears it's not registered for use there: http://www.epa.gov/pesticides/chem_search/ppls/007173-00286-20110808.pdf

See also <http://www.epa.gov/pesticides/regulating/rozol-final-cancel-order.pdf>

And here's the story straight out of the local Clovis newspaper: <http://www.cnjonline.com/digest/story-678367.html>

I have no idea where the Clovis Journal come up with the March 15 deadline.

Thoughts?
